Corporate and campuses

Optimize your parking operations

The expansive areas that are synonymous with campus life – whether corporate or higher education – can be beneficial for businesses that require multiple buildings and locations to operate.

However, as an employee or visitor to these locations, finding parking can be a challenge. In some instances, there may only be one parking space for every five students on a higher education campus, which indicates a significant shortage that can be detrimental to students and faculty. Urban campuses face even higher levels of parking shortages.

Mobility in campuses is a huge issue. And violations are on the rise. In 2016, the University of Buffalo issued 17,750 citations and the University of Central Florida issued more than 43,000 tickets. And violations are on the rise. Many times, students prioritize getting to class on time over finding legal parking spots. And many of these violations remain unpaid. But while parking citations can be a funding source for universities, they don't fix parking issues. By investing in intelligent parking management infrastructure, today's campuses can turn real-time data into actionable information about the number of spaces in use, empty lots and lost revenue

information. The solution, combined with guidance technology, helps direct drivers to open spaces, saving time, energy and resources, while also increasing quality of life for students, faculty and staff.

For expansive corporate campuses that service a large workforce, communication is critical to the effectiveness of an intelligent parking solution, not to mention increasing productivity by reducing the headaches of searching for parking. The addition of critical messaging, coupled with driver direction, can also elevate an organization's visibility, capitalizing on marketing and advertising for an organization's services, closures, weather-related information and public service announcements, increasing ROI.

Cleverciti's intelligent parking solutions optimize parking operations and make it easier for drivers to locate available parking. Cleverciti is the first step in ensuring a seamless and hassle-free experience for employees and students.

As a leader in intelligent parking solutions, Cleverciti sensors capture valuable data that can be used to increase the flexibility, efficiency and availability of parking in today's busy educational and corporate campuses. It provides these organizations with a robust and highly reliable solution that enhances convenience, builds loyalty and brand engagement, allowing customers to maximize ROI and streamline the parking experience.

Real-time data and guided parking

Get your students and employees to their destination on time with Cleverciti technology that harnesses the power of interconnectivity, edge computing, artificial intelligence and the Internet of Things (IoT) to eliminate parking challenges on university and corporate campuses. Cleverciti enables users to:

- 📶 Enhance employee and student parking experience
- 📶 Reduce traffic and emissions
- 📶 Grow revenue
- 📶 Identify problem areas
- 📶 Maximize use of outdoor parking areas
- 📶 Enhance communication with visual displays
- 📶 Access intelligent data on peak parking times and driver habits

Cleverciti's smart parking solutions are the first step in ensuring a seamless and hassle-free parking experience for your employees and students. Our technology guides drivers to the closest open parking spaces, reducing the complexity and stress of the parking experience. Instead of searching for a space based on luck of the draw, drivers gain immediate access to a building or facility. Additionally, Cleverciti's Circ360, delivers not only parking guidance, but an opportunity to engage with employees and students by delivering communications and messaging on high-visibility LED signage.

Cleverciti helps organizations reduce traffic and emissions, and increase revenue while allowing drivers to enjoy a smooth, stress-free parking experience. Get to know more about our company and our solutions, and gain the opportunity to receive a free parking plan at www.cleverciti.com.

Use Cases

Parking Data & Guidance

Compatible with on- and off-street surface parking that often defines urban campuses, Circ360 directs drivers to the closest available parking space. It is easily understandable with a quick glance.

Credential & Location

Leverage the ClevercitiCard to identify and grant access to permit holders, track space availability in real time, and assign available spaces to users upon arrival.

Gain Intelligence

Cleverciti technology allows operators to collect data about peak demand times, when lots are full or lack use, and whether drivers are parked illegally. By utilizing the power of advanced intelligence, users can see where you can leverage parking areas to best support the goals of the organization.

Data to optimize your parking

Gain new Levels of intelligence

Cleverciti provides a powerful combination: precise parking data and instant local guidance in a single solution. Intelligent sensors are easily installed on existing infrastructure to reduce downtime and closures. The ClevercitiCockpit analyzes data with sophisticated analytics to help you identify the precise data needed to best manage your parking operations and your organization.

Cleverciti Systems is the leader in comprehensive, intelligent solutions for parking detection, monitoring and guidance. Cleverciti provides organizations with a powerful solution that enhances convenience, builds loyalty and boosts engagement, allowing customers to maximize ROI and streamline the parking experience.
